Accredited Agency**

February 5, 2019

TO: Sheriff Timothy K. Cameron

SUBJECT: Analysis of Officer Use of Force for 2018

The following is an analysis for the use of force by deputy sheriffs of the St. Mary's County Sheriff's Office during the periods of January 1 through December 31, 2018. Data for the analysis was derived from the collection of the Use of Force reports completed by law enforcement officers and reviewed by the officer's chain of command. Once the reports are reviewed and approved, they are forwarded to the Office of Professional Responsibilities and entered into the Early Warning System.

Sheriff's Office policy states, in part, all instances of the use of firearms, with the exception of dispatching an animal, FN-303, TASER discharges, chemical agents, pressure point control tactics, impact weapons, physical force other than routine handcuffing, a Use of Force Report a Blue Team will be completed. In addition supervisors are now required to complete a supervisory review of all instances of use of force when able to do so.

In 2018, the Sheriff's Office handled 71, 224 calls for service as compared to 69,709 for the year 2017 a 2.2% increase. There were 123 instances of use of force. This equates to force being utilized once in every 579 calls for service.

Refer to the attached IA Pro Use of Force report for the statistical data.

Analysis

In calendar year 2018, the Agency reported 123 Use of Force incidents, in comparison to 2017, wherein 144 incidents reported. There was a 15% decrease in the overall Use of Force incidents. This is not a significant decrease, but a decrease nonetheless. However, over the past two (2) years there is a 22% decrease in the Use of Force. This is significant and this would indicate deputies are implementing their training in de-escalation techniques.

TO: Sheriff Timothy K. Cameron – February 5, 2019

SUBJECT: Analysis of Officer Use of Force for 2018

Refer to the attached IAPro report of Use of Force for a breakdown on the types of force utilized by sworn personnel.

Recommendation

From the review of the Use of Force reports from 2018, and in comparison to previous year's statistical data, most Use of Force incidents were within the scope of agency policy and procedure. There were no identifiable trends that would indicate excessive or brutal force being utilized by agency personnel.

In 2018 there was one Use of Force incident identified by the Office of Professional Responsibilities wherein inappropriate force was applied. Training was provided to the involved officers.

Hopefully the decline in the use of force will continue as a trend in the years to come.

It is apparent based upon the data sworn personnel within the St. Mary's County Sheriff's Office are responding to their training and adhering to the policies of the office. It is evident supervision is holding their personnel to task thus reducing agency liability. The efforts of all the Sheriff's Office personnel should be commended.

The agency has recognized first line supervisors are conducting thorough supervisory reviews for each Use of Force incident. This is believed to be a contributing factor in the reduced number of Use of Force incidents.

Michael H. Gardiner
Lieutenant
Office of Professional Responsibilities
